

SEP 17 1981

Mr. Harry E. Fitzwater
Deputy Director of Administration
Central Intelligence Agency
Washington, DC 20505

Dear Mr. Fitzwater:

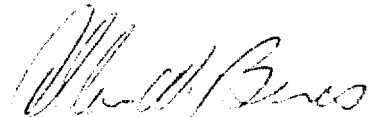

In compliance with Executive Order No. 12003, dated July 20, 1977, the General Services Administration (GSA) administers a consolidated Federal fleet average fuel economy program for passenger vehicles and light trucks acquired (purchased or leased for 60 days or more) by executive agencies.

Executive agencies are required to submit their acquisition forecasts to GSA by December 15th of each year. Federal Property Management Regulations Subpart 101-38.13 outlines the reporting requirements and stipulates the actual fleet average fuel economy requirements for each fiscal year through 1985. The fleet average fuel economy miles per gallon (mpg) requirement for fiscal year 1981 is 26 mpg for passenger vehicles, 16.7 mpg for 4x2 light trucks, and 15 mpg for 4x4 light trucks.

In order to measure progress toward attainment of these requirements, GSA periodically sends each agency a list of vehicles actually acquired and the cumulative fleet average fuel economy report for vehicles acquired by your agency from October 1, 1980, through June 30, 1981. A final report will be sent in early fiscal year 1982.

Please contact Mr. Larry Frisbee, Acting Director, Federal Fleet Management Division, Office of Motor Equipment, on 275-1021, should you have any questions or note any discrepancies in this report.

Sincerely,

ALLAN W. BERES
Commissioner
